TEMPTECH

Ideal conditions
With a Temptech wine cabinet you always have correct tempered and ready-to-serve wine!

Tips when buying a wine cabinet

With a wine cabinet you can store your wine collection in the correct way and you will always have the right tempered wine to serve! Here you will find some tips and advice on what to think about when buying a wine cabinet.

Temptech is the Nordic region's largest producer and supplier of wine cabinets. Our wine cabinets meet the highest demands on design and technology and ensures an optimal environment for wine storage. It is not without reason that well-known restaurants, wine bars, wine importers and wine connoisseurs choose our wine cabinets. In our wine cabinets the wine bottles is properly stored in correct and stable temperature and correct humidity. The wine cabinets have low noise and low vibration that does not impair the quality of the wine.

Temptech has a wide range of wine cabinets with over 50 different models of various dimensions, capacities and price rangers, for private or professional use. We have the wine cabinets to be built in kitchen, for full integration, large wine cabinets and small, freestanding models. We have wine cabinets that meets all needs and wishes!

For the love of wine!
A properly tempered and preserved wine will give the wine

a better taste and can even bring a better wine experience. At the same time, proper storage will provide better durability for the wine. The correct serving temperature relative to the wine type, grape and matureness of the wine is important. Store your wine bottles in a wine cabinet, and you ensure that you have the optimal environment for your wine collection.

Cooling technology
Our wine cabinets use compressor or thermoelectric cooling technology. With a compressor, the wine cabinet is cooled in the same way as a regular refrigerator. A compressor will produce some noise and vibration. To protect the wine against vibration we have developed special bumbers that absorb nearly all vibration made by the compressor. Normal sound level from our win cabinets is 38-40 dBa. The sound level for each specific model is specified in the specifications.

Our smaller, stand-alone wine cabinet uses thermo-electric cooling where the temperature in the wine cabinet is electronically adjusted. A fan inside the wine will circulate

the cool air. To achieve the desired temperature in the thermo-electric wine cabinets it is important that the wine cabinet is place free-standing with good ventilation and placed in a room with normal room temperature between 20 and 25°C. Since the thermoelectric wine cabinets do not have any compressors, they are low on sound and vibration.

Temperature zones and settings
Wine cabinets come with a single, dual or triple temperature zones. The temperature zones can be regulated individually. A dual temperature zone wine cabinet have a temperature range between 5 to 22°C, where the coldest temperature zone can be set between 5 and 12°C and the second zone between 12 and 22°C. However, it is not possible to set both zones at 12°C. There must be 1°C difference between the two zones (one zone may be 12°C, while the other one must be 13°C).

For storage of ready-to-serve white wine, it is recommended to set the temperature at 6°C, for red wine 14°C. For long-term storage of wine, the recommended temperature is 12°C, which will be optimal for all types of wine.

How large wine cabinet is needed?
Wine collections tends to have an amazing way of growing, and fast! When buying a wine cabinet, if space and budget allows, its recommended to get one that has 25-50% more capacity than the size of your current wine collection.

Made for kitchen
Our Premium and Oslo wine cabinets have standard dimensions and are made to be built in or be integrated in the kitchen.

Models for built-under, built-in, integrated, freestanding
Temptech has wine cabinets to be built under the kitchen worktop, for full integration in the kitchen and freestanding models. The built-under models, Premium and Elegance, can easily be placed in a niche under the worktop with no plinth in front. Our built-in Oslo wine cabinets are designed for full integrated in the kitchen, under the worktop with plinth in front, or in high cabinets. Our freestanding models, Trend and Performance, needs to have extra space and good ventilation.

Bottle capacity - how many bottles will fit?
Wine bottles come in many different sizes and shapes. Therefore, there is used a standard bottle dimension (75CL Bordeaux bottle) to indicate the bottle capacity of the wine cabinet. Normally, a wine collection contains bottles of various sizes and shapes. A simple rule is that the wine cabinet can store around 70-80 % of the indicated bottle capacity.

Correct humidity
Proper humidity is as important as the correct temperature when storing wine. Too dry air will make the cork dry out and too moisture air will damage the labels and can cause the cork to rot. Proper humidity should be at 50-70 %, which all Temptech wine cabinets handles.

What about the sound level?
The wine cabinet will make some sound from the compressor and the fan inside. Our wine cabinets has a sound level from 38-40 dBa.

Not only wine bottles!
A wine cabinet is also the perfect place to store wine on bag-in-box, just take out the plastic bag from the box and place it in the wine cabinet. Wine cabinets are also perfect for storing cigars, chocolate, gin and other spirits.

The 5 golden rules
Follow these rules to ensure that you store your wine collection at the best possible conditions!

The 5 golden rules
How to store wine correctly

A properly tempered and preserved wine will give the wine a better taste and can even bring a better wine experience. At the same time, proper storage will provide better durability for the wine.

Wine is a living product, evolving over time. For optimal and accurate storage, there are **five golden rules** that are important to follow. If you choose a wine cabinet from Temptech, you can ensure that you store your wine bottles at the best possible conditions.

1. Correct and constant temperature
It is important not to store the wine too warm or too cold. In general, all wines can be stored at around 10-12°C. To separate between white and red wine, white wine should be stored around 6-10°C while red wine is being best stored at around 14-18°C.

2. Humidity
In order for the wine cork not to dry in and to begin to leak in air (which can ruin the wine) it is important with a proper humidity. Proper humidity should be at 50-70 %, which all Temptech wine cabinets has.

3. Protection against light and UV-rays
Wine is sensitive to light which can make the ripening process of the wine accelerate. Sunlight also contains UV-rays that may be harmful to the wine. Most of our wine cabinets are equipped with protective, UV filter on the glass door. The interior LED lighting does not emit any heat either.

4. Protection against odor
Odor may penetrate the cork and deteriorate the quality of the wine. Odor can come from wooden shelves used in the wine cabinet. We only use untreated, wooden shelves that do not give off any odor. In addition, our wine cabinets are equipped with an active coal filter that cleanses the smell of the air in the wine cabinet.

5. Low vibration
Vibration over time will be harmful and affect the development of the wine. Vibration can occur from the compressor and spread out to the bottles via the shelves in the wine cabinet. Our specially designed vibration bumpers significantly reduces the vibration from the compressor.

Ideal serving temperature

The correct temperature of the wine you serve is essential for an optimal taste experience. Very often red wines are served a few degrees to warm and white wines too cold. A too warm or too cold wine will lose its flavours and palette.

Storing wine in a wine cabinet brings the wines to an ideal serving temperature. Using a wine cabinet with several temperature zones allows you to always have ready-to-serve white and red wine. In general, a wine is better served a few degrees too cold, than too warm. The temperature will always increase slightly when the bottle is placed on the table and served in the glasses. Therefore, a good tip is to set the temperature zone 1-2°C lower than the intended serving temperature. A simple rule for serving temperature is to serve young and light wines some chilled and older and more complex wines at a higher temperature. This applies to both white and red wines.

White wines are served best at temperatures around 7-10°C depending on the type of white wine. For example, a crisp and dry riesling is served a bit cooler than a full-bodied chardonnay.

Red wines are served best between 12°C to 18°C. Also here depending on the type of red wine. For example, a light and fruity valpolicella is served a little cooler than a rich, full-bodied and complex bordeaux. If you keep your wine for a long-term storage in the wine cabinet, the serving temperature is not that important. Red wine, white wine, sparkling and fortified wine can all be stored at the same temperature around 10-12°C.

With a dual temperature zone wine cabinet, you can for example set one zone for ready-to-serve white wine and the other zone for red wine. You can also divide the zones with one zone for serving-ready wine, and the second zone for long-term storage - there are many opportunities!

Below you find an overview of the ideal serving temperatures recommended for different types of wines. Remember, it's advisable to set the temperature of the wine cabinet 1-2°C below this, as the wines will increase slightly in temperature after serving. Cheers!

Ideal serving temperature

Sparkling wine	6 - 8°C
Champagne	8 - 11°C
Light, dry white wine	7 - 9°C
Full-bodied white wine	9 - 12°C
Light red wine	12 - 14°C
Medium-bodied red wine	14 - 16°C
Full-bodied red wine	16 - 18°C
Fortified wine	16 - 18°C

Wine cabinet technology

A wine cabinet is not just a refrigerator with a glass door.
Here is an overview of the components that makes a wine cabinet.

Pull-out shelves in
beech wood

Storing capacity for
6 to 153 bottles

Interior
LED-lighting

Optimal humidity
at 50-70%

Digital display
and touchpanel

Coalfilter cleanses

Choose between single,
dual or three zones

UV-protected
glass door

Compressor or
thermoelectric cooling
technology

Special developed
vibration bumbers

Optimal storing conditions
Our wine cabinets meets the strictest requirements for design and
technology and ensures optimal storage conditions for your wine collection.

FW16SB
Perfect wine cabinet for smaller places.
Single temperature zone (12-18°C)
and capacity for 6 bottles.

Trend
Ideal storing for the wine lover or the connoisseur

Our TREND wine cabinets meets the highest demands on design and technology and ensures an optimal environment for wine storage.

These freestanding wine cabinets is the ideal solution for any wine lover, wine connoisseur or for professional use.

With thermoelectric cooling the wine cabinets will not produce any noise or vibration - convenient for both you and your wine!

Choose between a single (adjustable between 12 to 18°C) or dual temperature zone (adjustable from 8-12°C and 12-18°C). Since the wine cabinets uses thermoelectric cooling it is important to place the wine cabinet in a normal room temperature at 20-25°C so the wished temperature can be reached.

These quality wine cabinets have an exclusive look with a tinted glass front with integrated handle. The digital display and touchpad on the front of the door gives an easy monitoring and adjusting temperature and light. Internal LED lighting and metal pull-out shelves gives a good over-view of your wine bottles.

FW78DB
Serve your wine at the perfect drinking temperature! Dual temperature zone and capacity for 32 bottles.

MW95SBS
Elegant design with a stainless steel framed glass door. Single temperature zone and capacity for up to 34 bottles of wine.

Performance
Exclusive design and perfect drinking temperature

Our PERFORMANCE wine cabinets have an exclusive design and the right storing conditions for your wine collection.

These elegant wine cabinets have an exclusive design with a glass front door with a stainless steel frame and an integrated door handle.

The PERFORMANCE wine cabinets are freestanding units and use compressor cooling. They come with a single temperature zone with a range between 5 to 18°C. This enables you to have the perfect and ideal serving temperature on any type of wine.

The metal shelves can be pulled out and gives a good overview of your wine bottles.The models also features interior LED lighting and digital temperature control.
Energy class A+.

**Standard dimensions
for kitchen**
The PREMIUM wine cabinets
comes in various sizes.
Available in 15 cm, 30 cm,
40 cm and 60 cm width. The
height is 86,3 cm which makes
the wine cabinets fit perfect
under the kitchen counter.

Premium
Discover the best
of your wine!

**Our PREMIUM series is specially developed to fit perfectly in the kitchen.
With standard dimensions and equipped with front ventilation,
the wine cabinets are easy to install under the work top.**

The PREMIUM wine cabinets are available in various dimensions, specially designed to be installed in kitchens. With standard measurements and ventilation in front, the wine cabinets can easily be fitted and installed under the kitchen counter. These quality wine cabinets are available with a stainless steel or black slimline front. The wine cabinets are equipped with interior LED lighting, LCD display, digital temperature and light control, UV-protected glass door, wooden, pull-out shelves and active coal filter for clean air. Available with one or two adjustable temperature zones for ideal serving temperature. With stable and correct temperature and humidity, UV-protection and low vibration you can ensure your wine bottles are stored perfectly.

VWCR46DS
One of our most-selling models.
The VWCR46DS with dual temperature
zone and capacity for 46 bottles
is the perfect choice for any kitchen.
With standard dimensions and ventilation
in front, it is easy to install!

Small kitchen?
Our VWC7SB is only 15 cm
wide and fits 7 bottles of wine.
Also available with stainless
steel front.

OBIU30DSS-3G
Only 30 cm wide but still with dual temperature zones and a storing capacity of 17 bottles.

White design
The OBIU60DW-3G has a clean design with its white glass front door with integrated handle.

Oslo

Modern, seamless design for full integration in the kitchen

The OSLO series with its modern, stylish look is designed for a seamless, full integration in the kitchen.

These high-quality, modern wine cabinets have an exclusive design with a stainless steel or glass front in black or white. With standard dimensions the wine cabinets are easy to install and integrate in any kitchen.

The Oslo wine cabinets are delivered with a single or dual temperature zone which can be regulated separately.

This ensures you to always have the right serving temperature on your wine. Interior LED lighting, LCD display and digital touchpad gives you full control of the temperature and lighting.

With the correct and stable temperature, optimal humidity, low vibration and clean air, you keep your wines at a professional standard.

Modern, seamless design
Specially developed for integration, the OBIU60DBB-3G gives the extra touch to your kitchen. Stylish design with a black glass front with integrated handle. Wooden pull-out shelves and interior LED lighting. Dual temperature zones with capacity for 46 bottles of wine.

OBIU60DXL-3G
Modern with an all stainless steel look. 60 cm wide, dual zone and fits 46 bottles.

OBI60SB
Single, adjustable temperature zone with room for 30 bottles. Standard dimension for built-in column.

Triple temperature zone
With three temperature zones you can have ready-to-serve sparkling, red and white wine!

Built-in column

Upgrade your kitchen with one of our OSLO built-in column wine cabinets. Easy to install with standard kitchen dimensions at 60 cm width and 45 cm, 60 cm or 124 cm height, they match any other appliances.

Available in stainless steel or with black or white glass door with stainless steel handle. The doors can be hinged as desired.

Pure, white interior LED lighting, digital display and touch panel for controlling light and temperature. Pull-out, wooden shelves. Low energy consumption.

Single, dual or triple temperature zone

With our largest built-in column models OBI124 you can choose between single, dual or triple temperature zone. All temperature zones can be regulated separately.

OBI124SB has a single temperature zone which can be regulated from 5°C to 22°C. **OBI124DB** come with dual temperature zone (5-12°C and 12-22°C). With our triple (5-22°C, 5-12°C and 12-22°C) zone model, **OBI124TB**, you always have ready-to-serve sparkling, white and red wine!

OBI45SB-T
Modern wine cabinet with black glass front and tip-open door. Single temperature zone and 24 bottles.

OBI45SB
Two facing units can also work as a solution for dual temperature zones.

Elegance

Elegant design with perfect storing conditions

Elegant design combined with optimal wine storage and serving conditions for your wine collection.

Our ELEGANCE series with its elegant, clean lines is available with front in stainless steel or glass front in black or white finish. The two separate temperature zones (5-12°C and 12-22°C) allows you to store several types of wine with ideal serving temperature. Available in two sizes;

60 cm wide unit with 46 bottle capacity to be fitted under the kitchen counter and a large, freestanding unit with a 153 bottle capacity. Both with the best possible conditions for wine storing. Protected from variations in temperature, humidity, harmful UV-rays and vibration.

Restaurant models
The large Elegance GRN280 models is the perfect choice for use in restaurant and bars. Dual temperature zone and capacity for 153 bottles (more if you remove some shelves).

Stylish, white design
The GRN46DW has a clean and modern design with a white glass front, integrated handle and digital touch panel on the front of the door.

Label-view - designed for professional use!
The CD180SB-B is designed for professional use in restaurants, bars and wine shops. The eye-catching label-view shelves shows off and gives a good overview of the wine collection.

Copenhagen
Show off your wine collection!

These label-view models have a very good exposure of the wine bottles.
For professional use or for the wine connoisseur!

The eye-catching COPENHAGEN wine cabinets comes with two capacities; 38 or 143 bottles with a single temperature zone that can be regulated between 5 to 22°C. The special label-view shelves have the label of the wine bottle exposed in front. This makes it even more easy to keep track of the wine collection! Designed for professional use in bars, restaurants and wine shops. The shelves can be pulled out completely and fits all kinds of bottle shapes; bordeaux, burgundy, champagne, riesling and even magnums.

Retro fridges

These nostalgic and decorating retro fridges brings the extra touch to your kitchen! Choose between different sizes and colours.

The nostalgic and decorating retro design with the rounded shapes are inspired by the vintage, American styled refrigerators from the 1950's.

The retro fridges add a stylish touch to your kitchen, mancave, teenager's room, at the restaurant, bar or in a hotel room.

Our retro fridges combines the authentic 50s retro look with the latest cooling technology. The retro fridges come in various sizes; small mini fridge at 46L, a 115L fridge to place under the counter and a large freestanding unit at 330L with integrated top freezer. Available in different colours; light blue, white, black or red.

Two models (HRF46RBGLASS and HRF130RBGLASS) comes with a glass door which allows you to present the contents in an eye-catching way!

HRF130RLBLUE
Nostalgic and
eye-catching design!

Icemaker

Icemakers with large capacity for efficient production of square-shaped, crystal clear ice cubes. Freestanding units with a long durability.
For professional use in restaurants, bars and kitchens.

Icemaker

IceQueen ICEQ55S

• 25 kg daily production
• 20 kg ice storage capacity
• Square-shaped ice cubes
• Freestanding
• Fits under the counter
• Stainless steel finish

Specifications

Daily production: 25 kg
Ice cube shape: Square
Storage capacity: 20 kg
Water/drain connection: Yes
Cooling: Air
Voltage: 220-240V
Power consumption: 260W
Product weight: 38 kg
Package weight: 45 kg
Product dimensions (WxHxD): 510x450x840
Package dimensions (WxHxD): 550x570x960
Certification: CE, Rohs
Coolant: R134a (190g)
EAN: 7090013676340

IceQueen ICEQ100S

• 50 kg daily production
• 27 kg ice storage capacity
• Square-shaped ice cubes
• Freestanding
• Stainless steel finish

Specifications

Daily production: 50 kg
Ice cube shape: Square
Storage capacity: 27 kg
Water/drain connection: Yes
Cooling: Air
Voltage: 220-240V
Power consumption: 350W
Product weight: 42 kg
Package weight: 54 kg
Product dimensions (WxHxD): 510x600x840
Package dimensions (WxHxD): 590x680x970
Certification: CE, Rohs
Coolant: R134a (280g)
EAN: 7090013676357

IceQueen ICEQ210S

• 100 kg daily production
• 40 kg ice storage capacity
• Square-shaped ice cubes
• Freestanding
• Stainless steel finish

Specifications

Daily production: 100 kg
Ice cube shape: Square
Storage capacity: 40 kg
Water/drain connection: Yes
Cooling: Air
Voltage: 220-240V
Power consumption: 750W
Product weight: 62 kg
Package weight: 76 kg
Product dimensions (WxHxD): 670x680x900
Package dimensions (WxHxD) 790x800x1060
Certification: CE, Rohs
Coolant: R404a (400g)
EAN: 7090013676371

IceMonster ICEM1000T

• 300 kg daily production
• 200 kg ice storage capacity
• Square-shaped ice cubes
• Freestanding
• Stainless steel finish

Specifications

Daily production: 300 kg
Ice cube shape: Square
Storage capacity: 200 kg
Water/drain connection: Yes
Cooling: Water
Voltage: 220-240V
Power consumption: 2350W
Product weight: 112 kg
Package weight: 129 kg
Product dimensions (WxHxD): 785x833x1080
Package dimensions (WxHxD): 930x820x1220
Certification: CE, Rohs
Coolant: R404a (1500g)
EAN: 7090013676401
