## FEATURES

**Gun Metal** The Gun Metal finish is obtained by treating steel with a physical process called PVD (Physical Vacuum Deposition) which deposits particles of noble metals on the surface. The result is a unique and refined aesthetic effect, and an improvement of the mechanical properties of the steel which is more resistant to impact and scratches.

---

**ONE SEAMLESS STEEL SURFACE** The waste-fitting and overflow are moulded on the sink. The product is therefore made out of one seamless steel surface, without gaps or interstices. A great plus in terms of hygiene.

---

**Deep bowls** This bowls reach an important depth, over 20 cm, thanks to the advanced production technology, that can be offer great capieny and praticity in all the washing operations.

---

**High thickness** 1mm thick steel. A significant thickness, which guarantees the maximum sturdiness and durability.

---

**Perimetral overflow** The overflow is always a security on the Foster sinks that prevents the overflow of water in case of oversights. The perimeter drain solution improves aesthetics thanks to its square and essential shape.

---

## Save space system

Drain and siphon are designed to leave as much space as possible in the under-sink area, more and more useful today for theseparate waste collection systems.

---

## Small radius

Bowls with squared shapes with a modern design and an increased capacity, for a minimal aesthetics connected with an extreme praticity.

---

## Space waste fitting

The elegant SPACE steel cap closes the drain and leaves no visible residues collected in the basket below. Space also has a small footprint and allows the optimal use of the under-sink compartment.
