

## SUB-ZERO, A MUST FOR THE OUTDOOR KITCHEN

Bring the standard-setting design and worry-free performance of Sub-Zero to your outdoor kitchen. The integrated drawers are sealed to lock in moisture and ensure maximum freshness in the ideal low-temp, high-humidity environment for optimum food preservation. Sub-Zero outdoor drawers, paired with outdoor panels, are engineered for temperatures up to 43° C and clad in heavy-gauge stainless steel that withstands UV rays, salt, and moisture — elements that would corrode lesser materials.
