

# 569L Series 7 French Door Refrigerator Freezer, Ice & Water

Series 7 | Contemporary

With its large capacity you'll have plenty of flexible storage space in this striking French Door refrigerator freezer.

- ActiveSmart™ technology to help keep food fresher for longer by stopping temperature fluctuation
- Door water dispenser and internal ice maker
- Spacious bottom freezer with full extension drawer gives easy access to frozen goods.

## DIMENSIONS

Height	1790 mm
Width	900 mm
Depth	695 mm

## FEATURES & BENEFITS

### ACTIVESMART™ FOODCARE

Every time you open your refrigerator, the temperature around your food changes. ActiveSmart™ foodcare adjusts airflow to create a stable temperature, helping your food stay fresher for longer.

### Water dispenser

The slimline dispenser makes it easy to fill almost any sized jug or vessel with cool filtered water without taking up any storage space in your fridge.

### Ice Maker

Fresh ice is always available for you in a dedicated freezer bin. Simply turn it off to free up freezer space, or during busy times you can boost ice production by up to 30%.

### Design quality

Our refrigerators are designed and built using quality materials. We use real stainless steel on our refrigerators, hidden hinges and solid glass for shelving.

### Easy cleaning

No more permanent dirty marks with our EZKleen feature for stainless steel fridges. Anti-fingerprint coating means you simply wipe clean any marks. Spill-safe secure glass shelves easily capture any drips or leaks.

### Clever energy

Your refrigerator adapts to daily use by cooling and defrosting only when needed. This means it uses only the energy it needs without compromising on food care.

### HUMIDITY CONTROL

Your fruit and veges need different environments. The humidity control slides in each storage bin create a microclimate that helps keep food fresher for longer.

## SPECIFICATIONS

### Accessories (sold separately)

Water filter replacement	847200 - FWC3

Features		Power requirements		
Adjustable door shelves	6	Rated current	10 A	<b>Where applicable:</b>  All appliances use energy, and energy usage typically generates carbon emissions. <b>Fisher &amp; Paykel Appliances' In-use Energy Carbon Emissions Estimate</b> indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.  Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
